

Focus on quality Achieve excellent

15 engineers spent 26,280 hours, improved 5% for your safe driving

Installation instructions

1. Wipe the paste parts with cleaning cotton

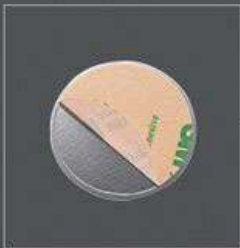

3. Uncover the 3M adhesive protective film of holder base

5. Paste in the flat position (With the pressure of not less than 3 kgs and lasts more than 10 seconds, then use it 24 hours later)

7. Put the magnetic sucker sucking to the sphere

2. Uncover the 3M adhesive protective film of attractive iron sheet

4. Paste the attractive iron sheet on the center of mobile phone

6. Put the mobile phone on the magnetic sucker

8. Adjust the angle you want

BUYER FAQ

Q: Will the functions be influenced when cellphones or pads attached to the holder with magnets?

A: The products are strictly tested according to the RoHS, which is up to EU standards, and we got abundant Third-party test reports to ensure that it's safe and without influence, just use them without worries. (warm tips: do not seek cheap and buy those non-certified products)

Q: Can we take down the magnetic guide sheets when the holders are not used?

A: Of course, just heat the glue with a blow drier and take them down, our products can be reused for several times, durable and rustless.

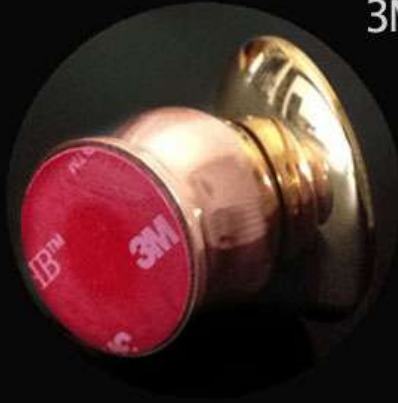

Q: How about the suction of the holder? Will the cellphones or pads fall off with an urgent brake during driving?

A: The products adopt NdFeB permanent magnets, which have a strong magnetic property and are environmental. Over 10,000 highway and off-road tests were made to guarantee the holding force, just go for a drive.

Q: How about the bottom glue, can they stick to the car firmly and not drop out?

A: We adopt top 3M traceless car adhesive, it's the special adhesive for automobiles, which resists both heat and cold. Used correctly as the instruction book, it's firm and will not leave any trace when you remove it, that's also why they are world-famous for.

3M double-sided seamless adhesive

- Anti-vibration, heat resistance, strong adhesion, high-strength adhesive.
- Good adhesion for plastic, metal, wood, paper and various materials whose surfaces are not easy to paste.
- With ultra-high adhesion, excellent durability at low temperatures.
- Moderate peel strength, disassembly without leaving any traces.
